

Toy Fox Terrier Health Survey Part #1: (Individual Dog Survey) Take this survey for EACH of your TFTs

Thank you for taking the time to complete this TOY FOX TERRIER Health Survey!!

Directions Video: <https://youtu.be/hRN6xn7TAos>

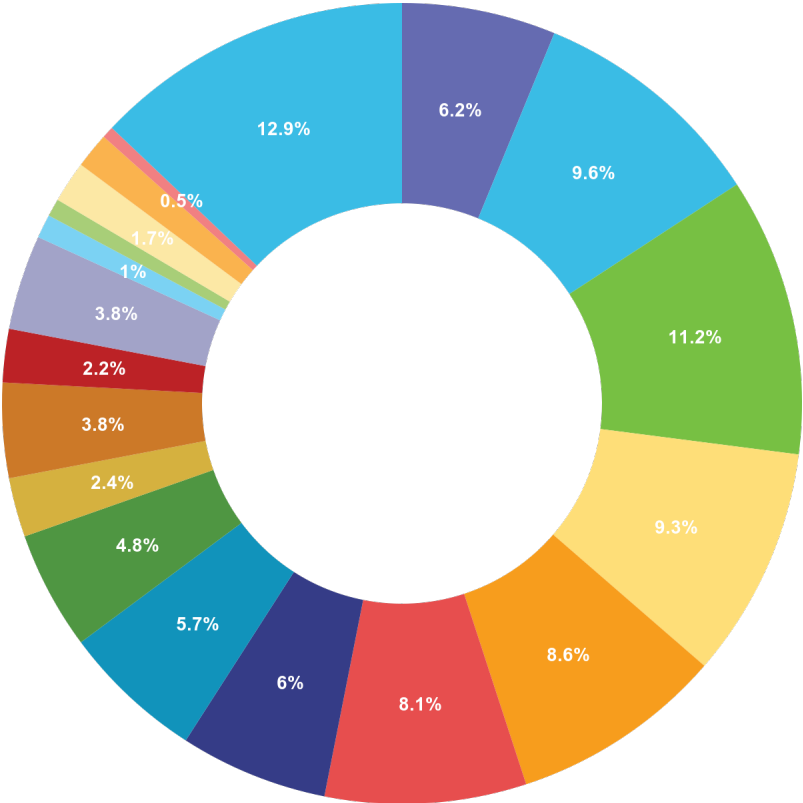

DIRECTIONS: please read and follow these directions carefully!

- ~ Please complete this survey for EACH of your toy fox terriers. (example: if you have 6 TFTs, you will complete this survey 6 times).
- ~ Please ONLY complete this survey for dogs that are AKC registered or TFTs who are AKC registerable but just not completed yet.
 - ~ Do NOT COMPLETE this survey if your tft is a mix-breed.
 - ~ Your responses are anonymous, so please be honest in your responses!
- ~If you have any questions about this survey, please email the committee chair, Amanda Halsey, at dynastytfts@hotmail.com

Thank you again for taking the time to complete this TOY FOX TERRIER Health Survey. The results of this survey will help raise awareness of health conditions in our breed.

Q4 General Information: Has this toy fox terrier been seen by a veterinarian for an examination in the last 12 months?*

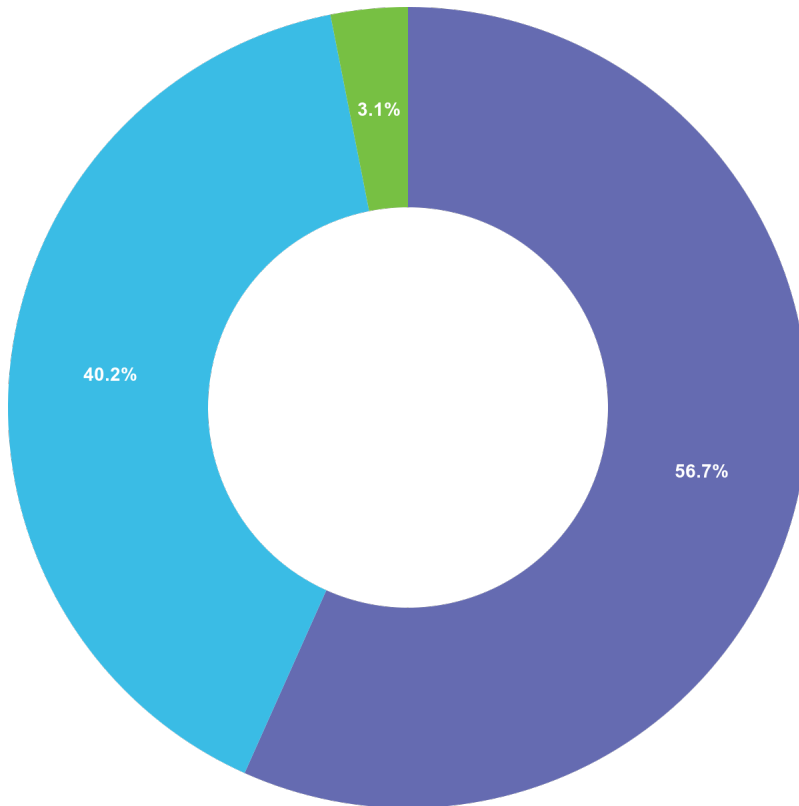

Answered: 418 Unanswered: 0

Choice	Total
Yes	363
No	55

Q5 Blood work: Did this TFT have baseline blood work completed around a year of age?

(This might be done to see if this dog is healthy prior to breeding and/or to have base line levels to compare to later as this dog ages and has blood work done routinely or when it's ill).*

Answered: 418 Unanswered: 0

Choice	Total
<input type="radio"/> Yes, this dog had base line blood work completed at or before turning 2 years old.	237
<input type="radio"/> No, I did not do any baseline blood work with this dog. I only do blood work if my dog	168

Choice

Total

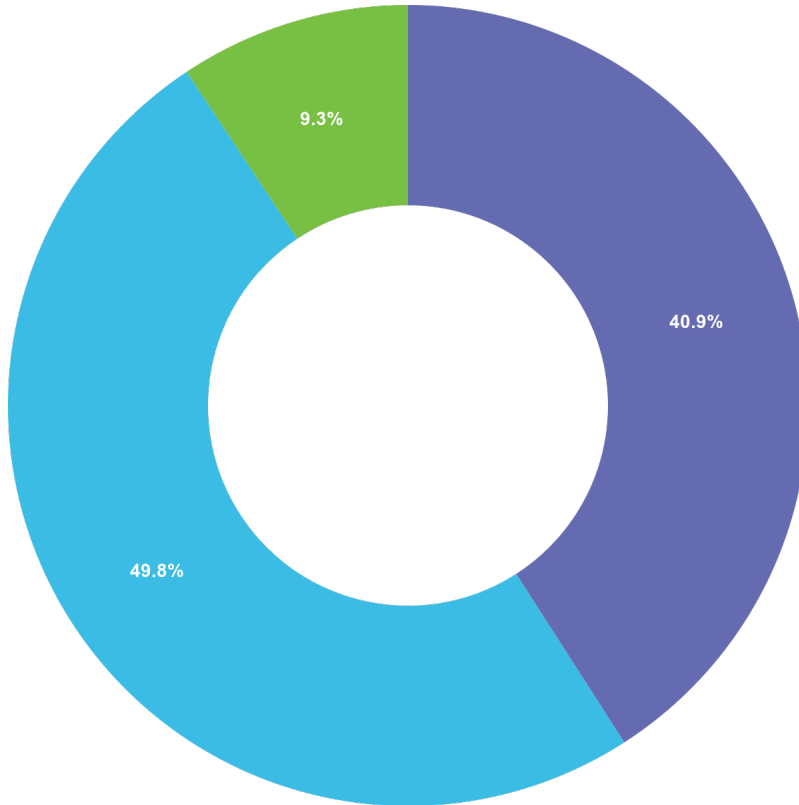

is ill.

No, I did not do any baseline blood work with this dog. I never do any blood work with my dogs.

13

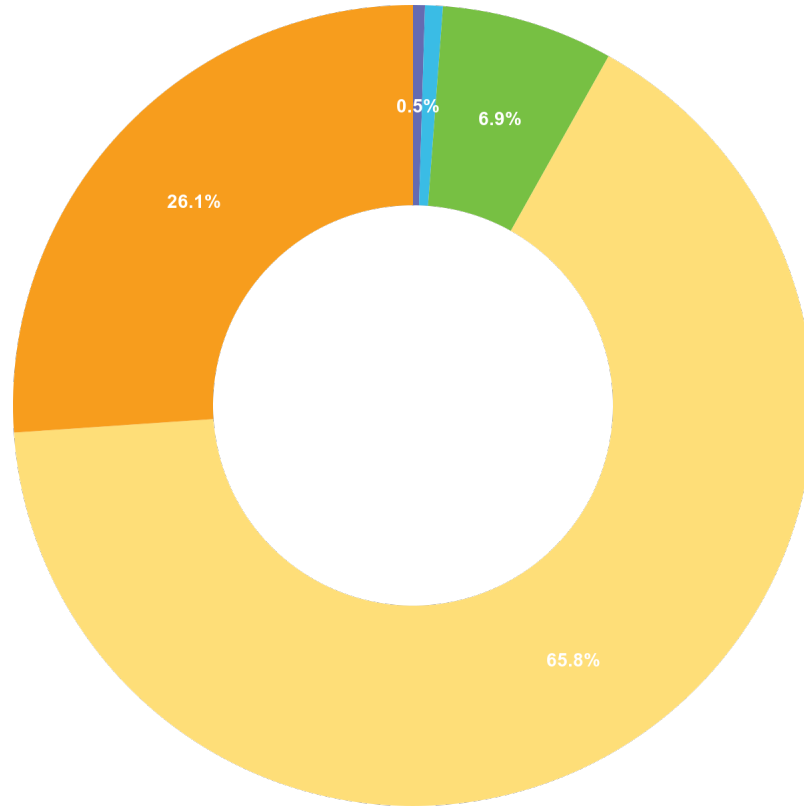

Q6 Liver Function: On blood work has this dog had elevated liver levels (ALT Levels)?*

Answered: 418 **Unanswered:** 0

Choice	Total
 This dog has NOT had the needed blood work to know if it has elevated ALT levels.	171
 This dog has had blood work completed, and it's ALT levels were normal.	208
 This dog has had blood work completed, and it's ALT levels were elevated.	39

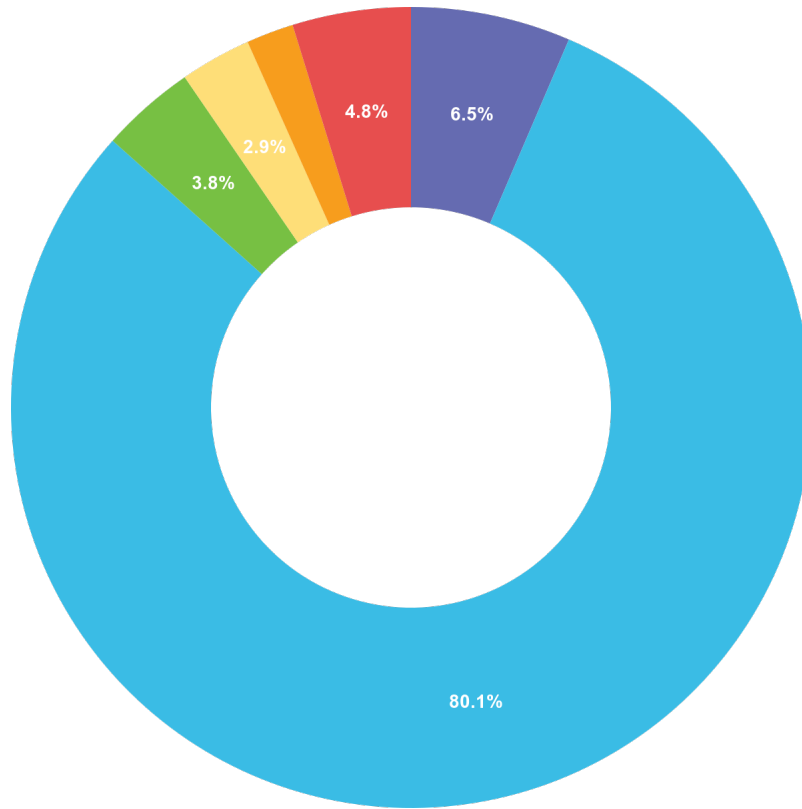

Q7 Liver Function: Does this dog have any of the following:*

Answered: 418 **Unanswered:** 0

Choice	Total
 Portosystemic Shunt	2
 Hepatic Microvascular Dysplasia	3
 Elevated Liver Enzymes but no confirmed diagnosis of liver disease	29
 None	275
 I am not sure. The dog has not had the needed bloodwork completed to know for sure.	109

Q8 Cardiac Question: Has this toy fox terrier been diagnosed with a heart murmur as an ADULT?*

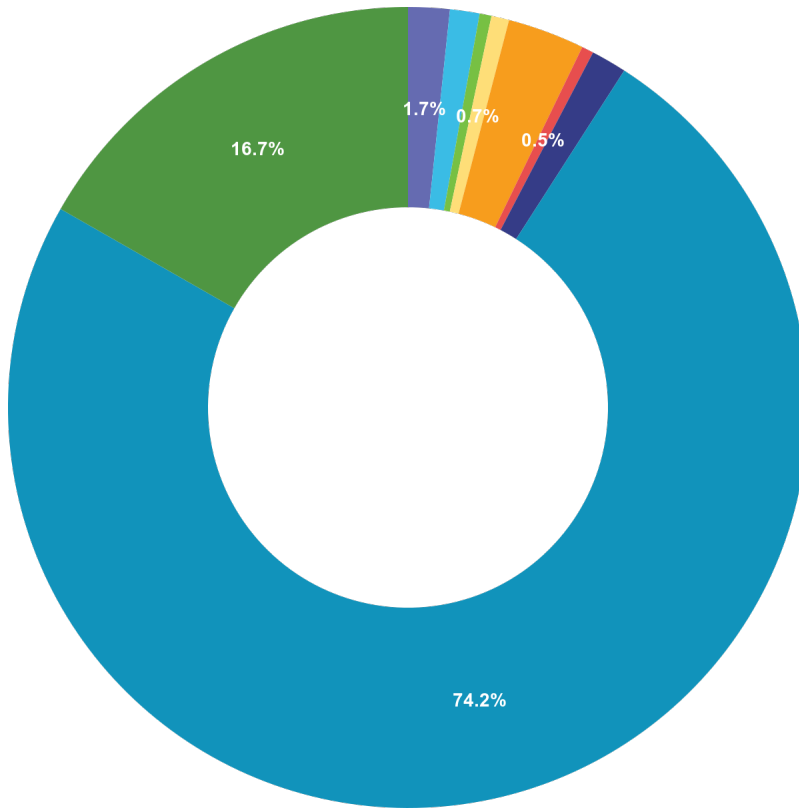

Answered: 418 Unanswered: 0

Choice	Total
 This dog is not yet an adult.	27
 No, the vet has never heard a heart murmur on this dog.	335
 Yes, the vet has intermittently heard a heart murmur on this dog.	16
 Yes, this dog has a consistent, soft (quiet) heart murmur.	12
 Yes, this dog has a consistent, loud heart murmur (easily audible).	8

Choice**Total**

- This dog has not been evaluated by a veterinarian in the last year to know for sure if it has developed a heart murmur. 20

Q9 Cardiac Question: If this dog has a heart murmur, at what age did it develop the murmur?*

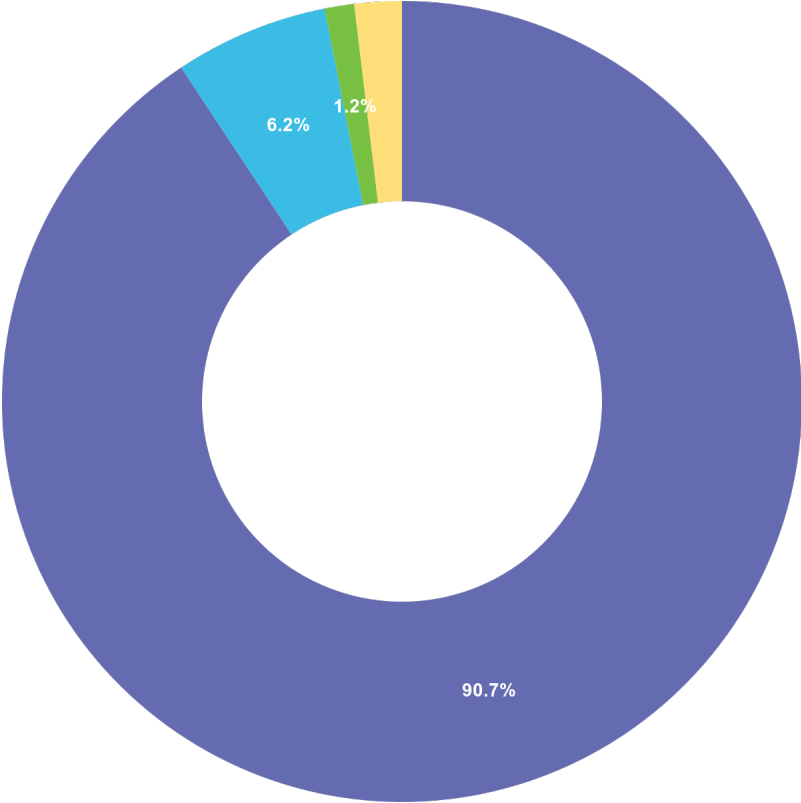

Answered: 418 **Unanswered:** 0

Choice	Total
 Has had a heart murmur since puppyhood/birth.	7
 Developed a murmur between 1-2 years of age.	5
 Developed a murmur between 3-4 years of age.	2
 Developed a murmur between 5-6 years of age.	3
 Developed a murmur between 7-8 years of age.	13

Choice	Total
 Developed a murmur between 9-10 years of age.	2
 Developed a murmur at 11 years of age or older.	6
 This dog has consistently (annually) been checked by a veterinarian and it has NEVER had a heart murmur.	310
 I don't believe this dog has a heart murmur, but it's not been annually checked by a veterinarian to know for sure.	70

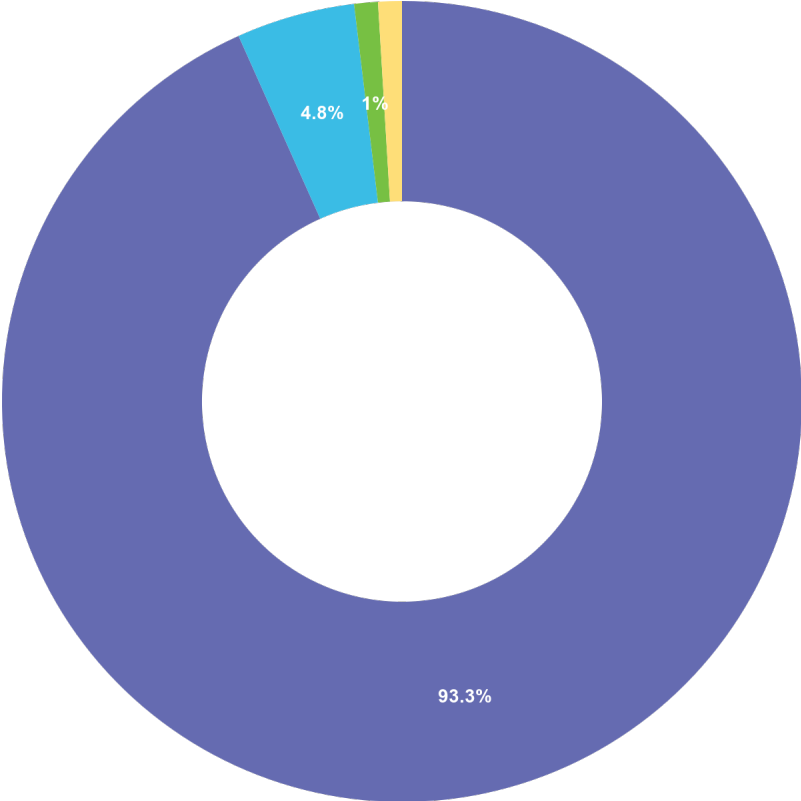

Q10 Broken Bones: Has this toy fox terrier ever broken a bone?*

Answered: 418 Unanswered: 0

Choice	Total
No, this tft has never broken a bone.	380
Yes, this tft broke a leg only one time as a puppy (<12 months old).	26
Yes, this tft broke a leg more than once as a puppy (<12 months old).	5
This tft broke a leg as an adult (>12 months old).	8

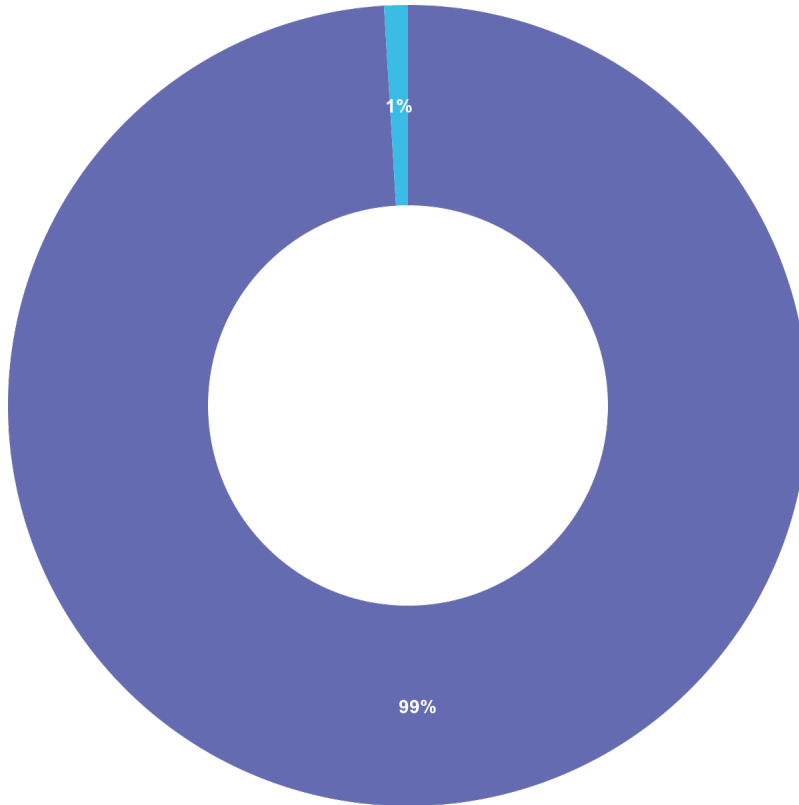

Q11 Neurological Conditions: Has this dog had seizures?*

Answered: 418 Unanswered: 0

Choice	Total
No, this dog has never had seizures.	390
Yes, this dog has occasionally had a seizure but is NOT medicated for seizures.	20
Yes, this dog has occasionally had a seizure, and it is medicated for seizures.	4
This dog has seizures often and is medicated for seizures.	4

Q12 Has your Toy Fox Terrier been diagnosed with a thyroid condition?*

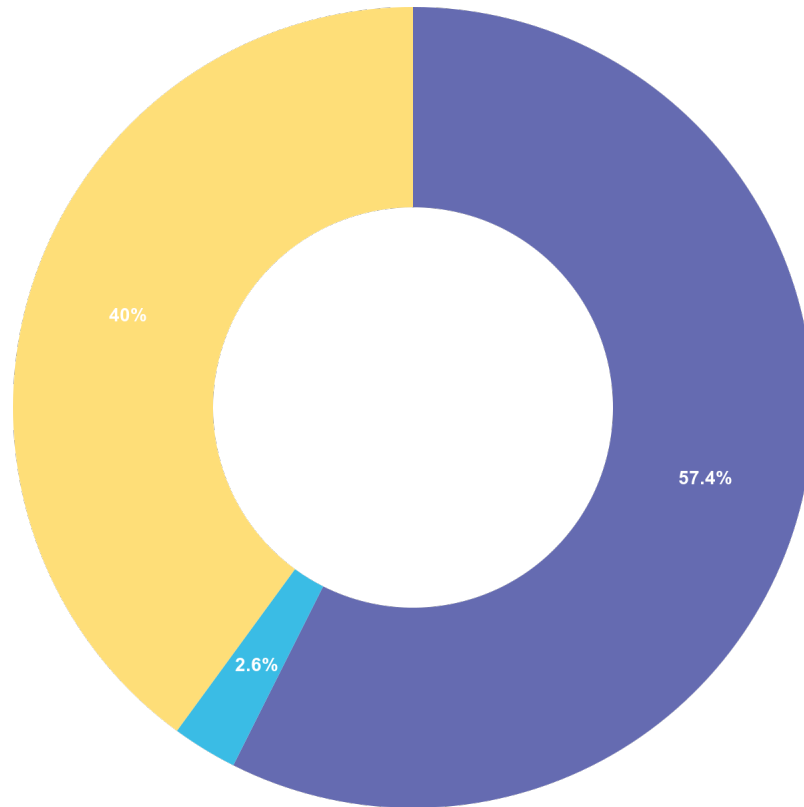

Answered: 418 Unanswered: 0

Choice	Total
<input type="radio"/> No	414
<input type="radio"/> Yes, please specify the condition and details here below in this box.	4

CONDITION:
Hypothyroidism: III
Hyperthyroidism I

Q18 Sensitivities/Allergies: Does this tft have skin issues? Select all that apply.*

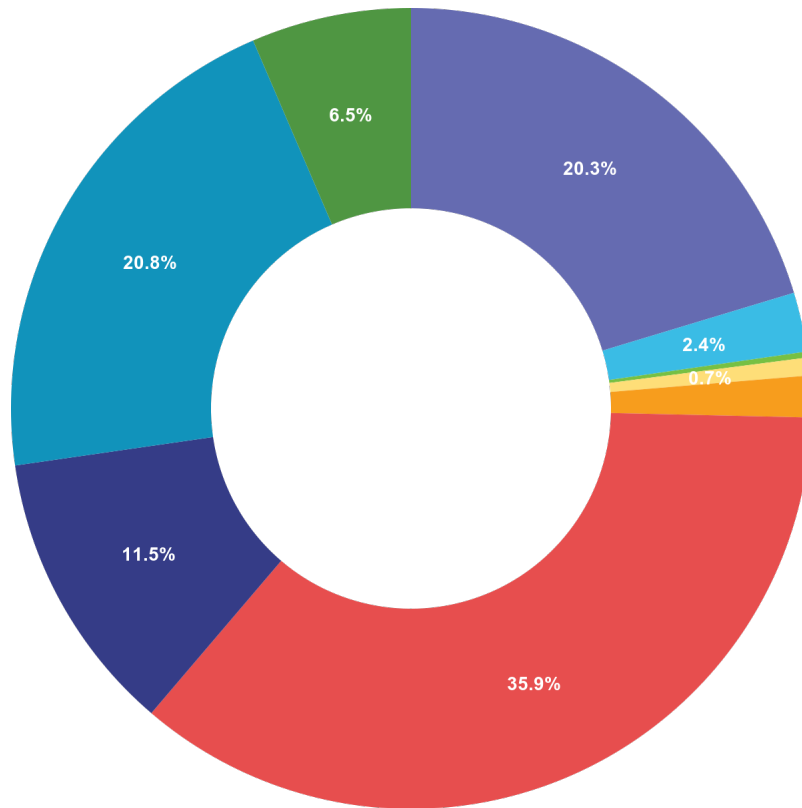

Answered: 418 **Unanswered:** 0

Choice	Total
 None	343
 Yes, mange, but minor and didn't require treatment	10
 Yes, mange that required treatment.	6
 Yes, seasonal allergies, food allergies, or flea allergy that cause skin issues. Please specify the allergens in the space below:	63

Q19 Orthopedic Conditions: Status of this dog's patellas as AN ADULT!

(Do NOT include what your vet said about this dog's patellas as a puppy).

If the dog's patellas are rated different numbers, please input the more severe (higher number).*

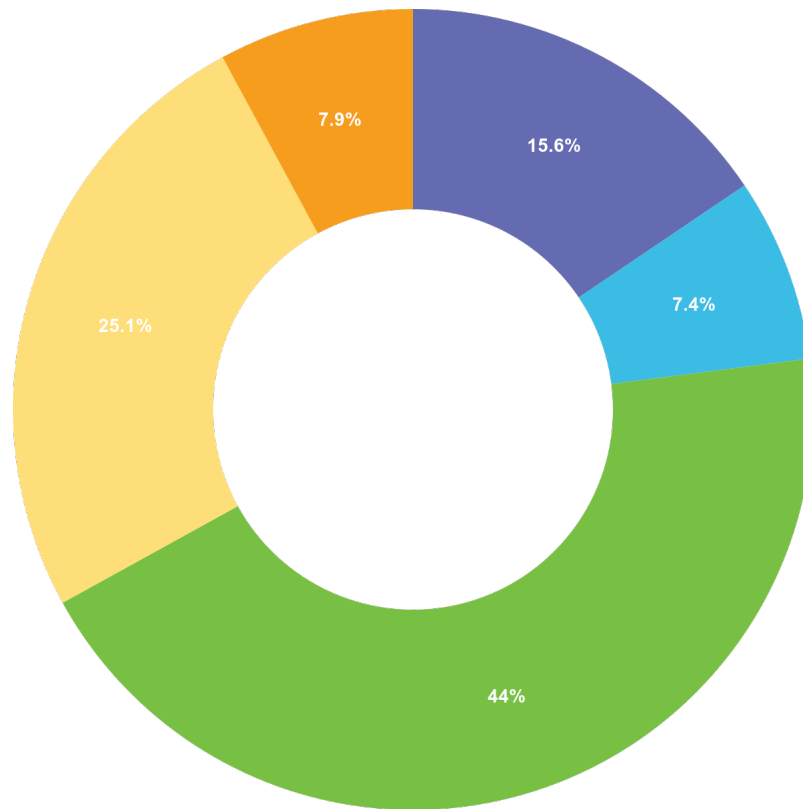

Answered: 418 Unanswered: 0

Choice	Total
 OFA - rated good	85
 OFA - rated grade ONE	10

Choice	Total
 OFA - rated grade TWO	1
 OFA - rated grade THREE	3
 OFA - rated grade FOUR	7
 Vet says they are good, but they have not gone through OFA certification	150
 Vet says there is some movement in the knees/patellas but have not gone through OFA certification	48
 This dog's knees/patellas have not been evaluated.	87
 This dog is too young (less than one year) to be evaluated.	27

Q20 Orthopedic Conditions: Patellas - has this dog's patellas been checked annually as it has aged?*

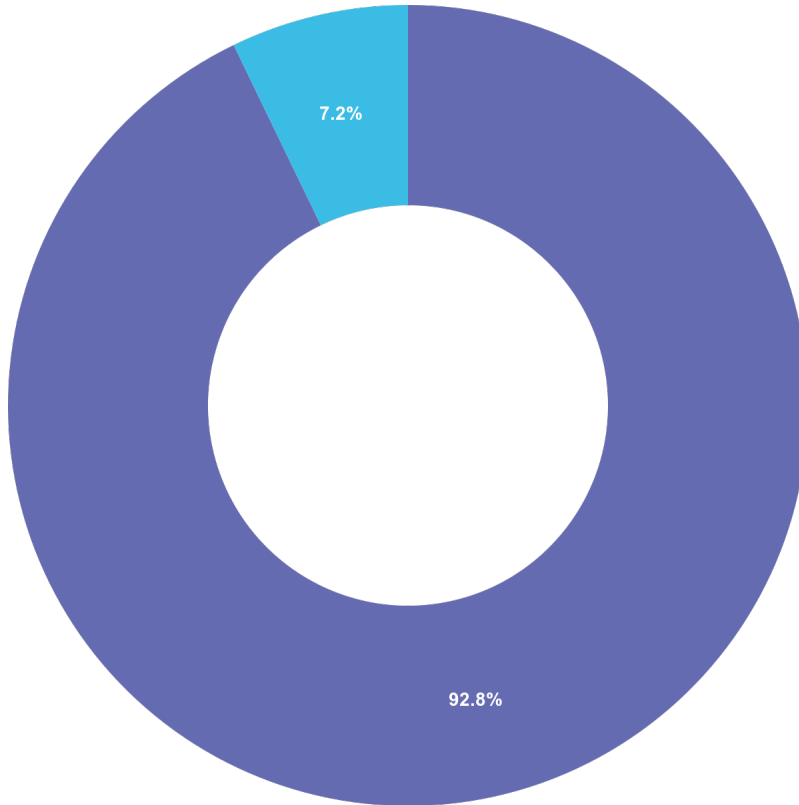

Answered: 418 **Unanswered:** 0

Choice	Total
<input type="radio"/> This dog's patellas have been certified with OFA, and it has it's patellas checked annually by a vet.	65
<input type="radio"/> This dog's patellas are only checked for OFA certification, and they are not checked after that.	31
<input type="radio"/> This dog's patellas are not certified with OFA, but my vet checked them throughout it's life.	184

Choice	Total
 This dog's patellas are not OFA certified, and they are not checked annually by a vet.	105
 This dog is less than 1 year old, so it is too young for annual patella checks.	33

Q21 Orthopedic Condition: Does this tft have spine or back issues?*

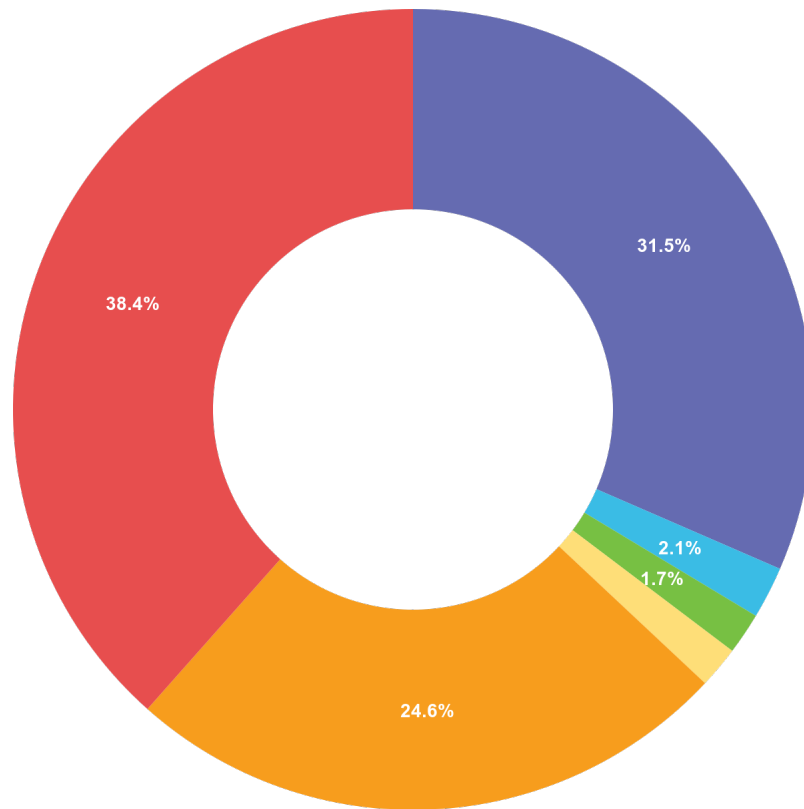

Answered: 418 Unanswered: 0

Choice	Total
● No	388
● Yes. Please specify the condition:	30

CONDITION:

- Kyphosis: III
- Injury from jumping or playing: IIIII
- Unknown Cause (Painful): IIIII
- Arthritis in Back: II
- Disc Issues: IIIIIIIII
- Loss of function of back legs: I (suspected DM)
- Spinal Atrophy: I
- Thinning of Spine: I

Q22 Orthopedic/Skeletal: Does this dog have any of the following teeth issues? Select ALL that apply to this dog.*

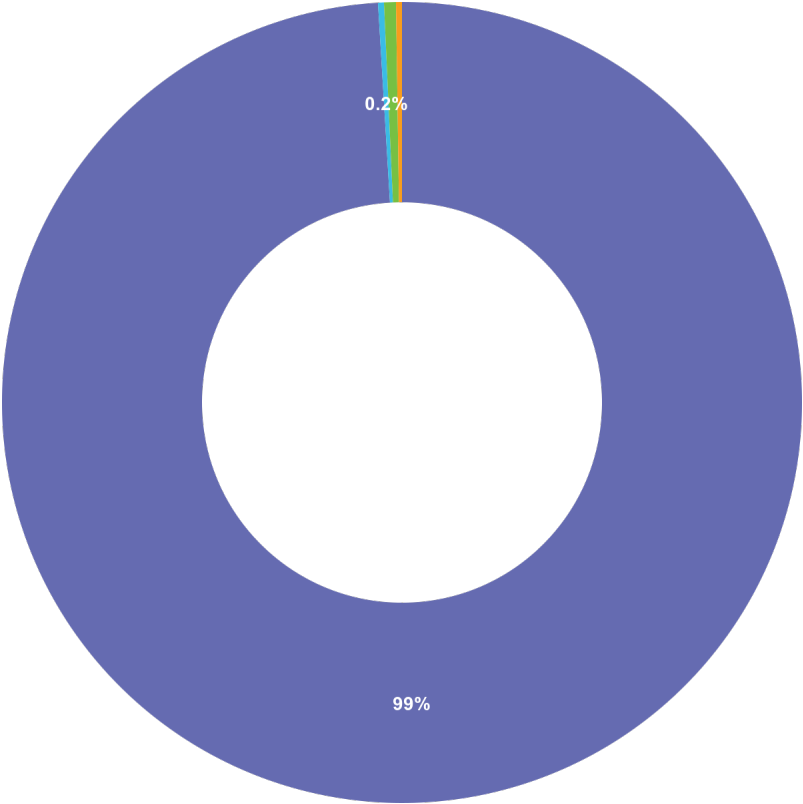

Answered: 418 **Unanswered:** 0

Choice	Total
 retained deciduous (puppy) teeth that required a veterinarian to pull	150
 Lance canines (canines that come in facing forward/horizontally, rather than pointing up and down/vertically)	10
 narrow base canines (canine teeth come in on the inside of the puppy teeth and don't move out into the proper placement)	8
 missing teeth (did not fall out - just never had all it's teeth)	8

	Choice	Total
	dental disease/lost teeth	117
	this dog has no issues with teeth	183

Q23 Additional Orthopedic Conditions: Please check any of the following conditions that this tft has or was born with: (Select all the apply)*

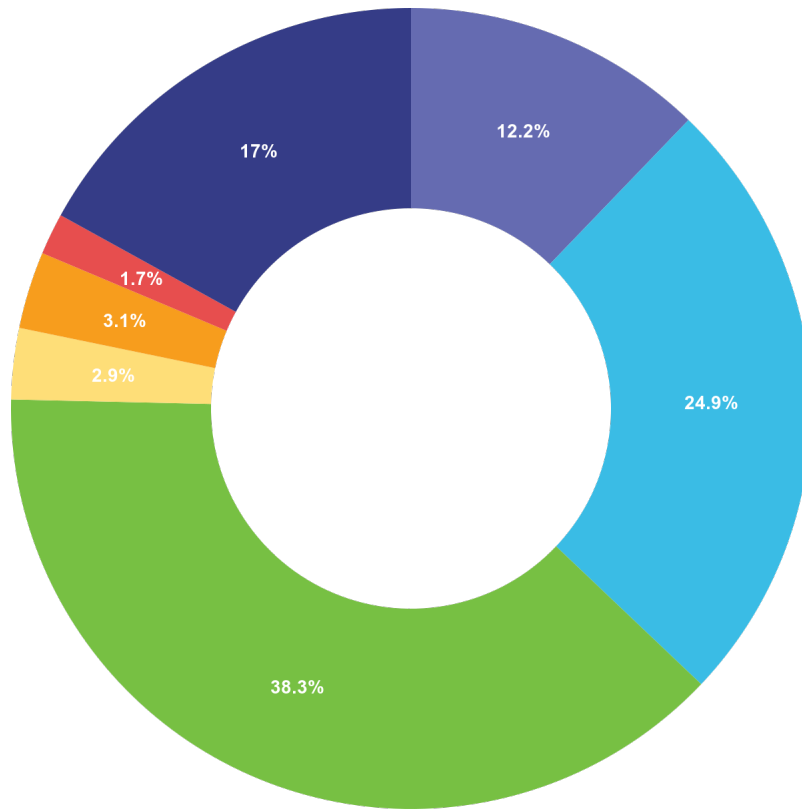

Answered: 418 Unanswered: 0

Choice	Total
None	414
hip dysplasia	1
Legg-Calve-Perthes disease	2
cleft palate	0
open fontanel	1

Q24 CHIC: Is this dog CHIC certified? The requirements for CHIC certification in TFTs are the following:

- 1) Patellar Luxation - Veterinary Evaluation of Patellar Luxation. Results registered with OFA.
- 2) Primary Lens Luxation - DNA based PLL test results from an approved lab
- 3) Congenital Hypothyroidism w/Goiter CONGENITAL HYPOTHROIDISM W/ GOITER DNA Test from an approved lab*

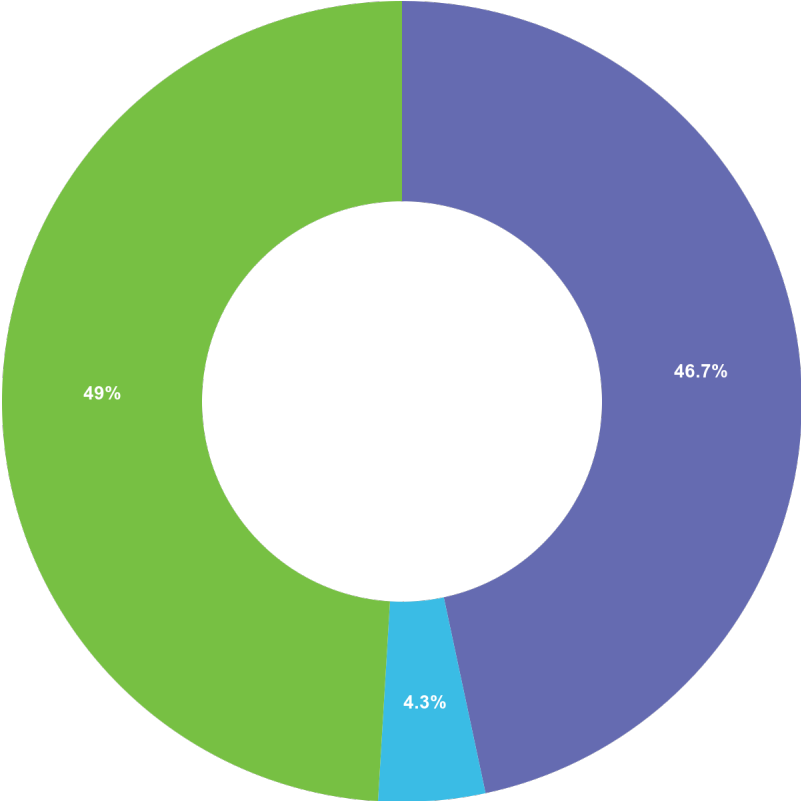

Answered: 418 Unanswered: 0

Choice

Total

Choice	Total
 Yes, this dog is CHIC certified.	51
 No, this dog is not CHIC certified, but it has completed OFA patella certification and is tested for PLL and CHG. (this dog is DNA tested, and not just clear by parentage)	104
 No, this dog is not CHIC certified and this dog has NOT undergone testing for OFA patella certification and/or is not tested for PLL and/or CHG (DNA tested and not clear by parentage).	160
 I am planning to complete CHIC certification for this dog, but this dog is less than 12 months old and is not old enough to OFA patella certification.	12
 This dog is less than a year old, but I am not planning to complete the health testing that would be needed if I decide to do CHIC certification.	13
 This dog is less than a year old. I am planning to complete the testing that would be needed for CHIC certification, but I don't plan to actually follow through with the step of getting the CHIC number.	7
