Undocked or natural bob: Set in line with topline. Tail left undocked should be ideally carried high in natural carriage above topline when moving or alert. The undocked tail carriage should also be a direct extension of the docked tail standard. The tail should be carried erect, straight up with a slight curve, never curled or laying over the back and in proportion to the body, with no kink or deformity.

Fault: Tail not in proportion to the size of the dog.

Disqualification: Tail curled or laying over the back.

Correct tail carriage below:

Incorrect tail Carriage Below

Board is to send their input to Billy to compile, send to committee and present at next board meeting. This will provide clarification for international showing where docking is not permitted. No intent to change our standard.
